

Bar None Morgans

Location: 355 Bar None Drive, Thermopolis, WY 82443

Mail: PO Box 70, Thermopolis, WY 82443

Breeding Contract:

This contract is for the 2019 breeding season, made and entered into by and between Harvey Seidel, Bar None Morgans, 355 Bar None Drive, Thermopolis WY 82443, hereafter designated as stallion owner, and owner of mare.

Mare Owner_____.

Address_____

Phone_____ hereafter designated as **mare owner or lessee** .

This contract covers the mare

(name)_____

AMHA #_____ being exposed to the Stallion,
_____ (name of stallion) breeding/service

fee is: TruWest Silver Suede \$800.00; Mountain Edge Black Chrome \$800.00, non-refundable deposit of \$450.00 is to be made with this contract, and the balance paid when mare is 45 days in foal. If all monies are not paid by December 1st of the calendar year in which the mare was bred, a stallion service report will not be filed for the breeding of said mare, and the foal will be un-registerable. All monies must be paid to the stallion owner before said owner will sign the stallion owners service certificate portion of the foal's registration application. (In the case of multiple breedings to the same owner a special discount may apply for the second and/or additional breedings.)

3) The mare owner agrees:

a) There is additional cost of mare care at the rate of \$5.00 per day for mare and \$7 for mare and foal.

b) Should artificial insemination be selected as the breeding choice, there is an additional cost of \$375 paid to the Oklahoma Equine Clinic who will ship semen to you. Two doeses of frozen semen will be sent.

The cost of frozen semen sent to The Oklahoma Equine Clinic includes postage for sending the frozen container. Frozen semen is only available for Truwest Silver Suede.

With the increase in pricing of Fed X the frozen semen route is actually cheaper and more viable than fresh cooled. Suedes motility at post thaw was 60 percent. We have great anticipation for good breeding success with the frozen semen.

c) Should the mare prove barren (not in foal) as determined by a licensed veterinary examination or should the foal die at birth, the mare owner will send notice of such, signed by a licensed veterinarian within 10 days of said determination.

d) If the mare does not conceive on the first two heat cycles, the mare must be cultured and be negative for infection and proof of same be provided to the stallion owner before further shipments will be made.

4) The stallion owner agrees that:

a) The breeding fee guarantees a live standing foal. Such definition means a foal stands and nurses. If foal does not stand and nurse a licensed veterinarian shall determine the cause of death before additional semen shipments are sent.

b) Should the foal die because of injury or neglect, the stallion owner is under no further obligation in the matter. In all matters a Veterinarian report is required.

5) The stallion owner and mare owner mutually agree:

a) This contract is invalid unless completed in full by both parties designated in the above blanks.

b) Should the above-named stallion die or become unfit for service or should the above mare die before being served (unless both parties agree to a substitute mare) this contract becomes null and void and the deposit refunded to the mare owner, except any previously incurred transporting or collection expenses plus reasonable expenses.

c) Should the mare prove barren or should the foal die at birth without standing and nursing, with a veterinarian certificate given to the stallion owner within 10 days, the stallion owner has the option to either re-breed the mare, (the only expense to the mare owner being

the transportation and collection fees) or to refund \$200.00. After the mare owner agrees to the above, this contract is considered fulfilled and the entire contract is canceled.

d) The above mare will **not be served** through more than four estrous cycles during the entire breeding season as designated above.

Fee Compilation:

Breeding fee: Deposit (non-refundable) \$450.00

Balance due after mare 45 days in foal Balance according to breeding fee.

Total. according to breeding fee.

A-I fees: AI is only available for Silver Suede. We have frozen semen available. His motility is amazing. After you pay your stallion fee and send us the proper fees we will contact Oklahoma Equine Clinic and they will send your vet the frozen semen. Total costs for this is \$375 which includes a return fee for the semen container. We will send two doses of semen in case the first one doesn't take. Questions, call us or the Oklahoma Equine Clinic at 405 642 8507 ask for Caity Hood.
